

Senior Scientist Transdermal Systems/ Oral Thin Films (m/w/d)

Gen-Plus GmbH & Co KG

Staffelseestraße 6 · 81477 München

Tel.: +49 (0) 89 - 78 01 79 - 40

Fax: +49 (0) 89 - 78 01 79 - 44

Gen-Plus is a small medium-sized, privately owned company. Its aim is to discover innovations for our contract partners. We design formulation and technology concepts for the pharmaceutical industry. This includes solid and semisolid dosage forms as well as patches and thin films. The range is from the early idea to the medicinal product under GMP conditions. Beside the conventional pharmaceutical technologies, Gen-Plus is investing in innovative technologies in area of personalized medicine.

To expand our research team, we are looking for a scientist especially in the field of Transdermal Therapeutic Systems (TTS) and Oral Thin Films (OTF).

Your Tasks and Responsibilities

- Hands-on project work in the development lab including internal project planning, documentation, data analysis and reporting/presenting of results
- Support during manufacturing of clinical trial supply under GMP
- Responsibility for equipment including GMP compliant documentation
- Preparation and review of SOPs and other quality documents
- Support of Business Development for TTS/OTF

Your Profile

- Studies in a relevant discipline (e.g. pharmacy, chemistry, life science) or professional training with at least 5 years' experience in pharmaceutical development
- Experience in the field of TTS and/or OTF is essential
- Sound knowledge of MS Office applications
- Positive, communicative and open personality helps you to understand other opinions and contributes to productive project discussions with internal and customer project teams

We offer

- Flexible working hours
- Personal development
- Attractive company health management
- Committed team
- Attractive location
- Opportunity to work independently
